Part of Records Package / Supplement / Correction

Dear Ms. Hanlon,

How can the Secretary of Energy plan to recommend Yucca Mountain for a high-level nuclear waste dump before the thousands of public comments on the Draft Environmental Impact Statement are addressed?

The Department of Energy cannot judge the fitness of a site without a Final Environmental Impact statement, a detailed transportation scenario, and a licensing rule. We the public cannot have confidence in any recommendation that comes from such a critically flawed process.

On behalf of all who must live with the results of the decision, I urge the Department of Energy to abandon the Yucca Mountain project.

Sincerely yours,

Sue Miller
